

DTC CRAGG RAILCHARGER®

FEATURES & BENEFITS

- Tension clamp AC main terminals
- Convection cooled
- Operating temperature -40° C to 70° C
- Wall mounted or rack mounting kit
- Microprocessor controlled
- Programmable battery equalization and temperature compensation to help extend battery life
- 20 x 20 OLED displays voltage, current, temperature and settings
- Adjustable current limit: 100-50%
- +/- 1% voltage regulation
- < 1 volt peak to peak output ripple
- Meets AAR/AREMA specifications
- Integrated voltage monitor measures voltage of entire battery bank and provides alarming when voltage is outside of control limits
- Compatible with battery cell monitor to measure voltages of individual battery cells and provide alarming when outside of control limits
- Two year warranty
